

The best method for communicating fast and positive with Americans - The online training for Tech Companies

Do you recognize one of these issues in the cooperation with non-Americans:	Do you like your non-American employee or team:
<p>"They are nice people, but they talk too much about problems and disadvantages."</p> <p>"Sometimes I don't understand what they want."</p> <p>"They go on and on about details."</p> <p>"They aren't flexible as we are. We have to act faster when things change."</p> <p>"It seems they don't understand time-to-market."</p> <p>"They can be rude, even in groups. It is shocking."</p> <p>"They can be vague and ambiguous." (depending the cultural background)</p> <p>"I am very clear, but they don't act in line with my expectations."</p> <p>"Stop talking, testing, just act. Customers are waiting."</p>	<p>To communicate more clear and positive?</p> <p>To build a trustful relationship with you?</p> <p>To share his/her knowledge, expertise and proposals in a clear, short and positive way?</p> <p>To understand you and your expectations better?</p> <p>To quickly achieve great (technical) results with you and your group?</p> <p>To make more money together with you?</p> <p>To help customers quickly?</p> <p>To resolve the bottlenecks and misunderstandings in the working relationship?</p> <p>To be less frustrated and enjoy working together? Do you or your team like to be less frustrated by this situation?</p>

Your employees learn to make great, short and positive (technical) proposals. They will **work as a united team that will decide and act faster**. As a business anthropologist and communication advisor I worked for Philips / NXP in several countries. I also lived in America.

Online training	Start now at www.4cunity.com
<ul style="list-style-type: none"> - For engineers, technicians, technical managers, project leaders, program managers, resource managers, quality managers, personal assistants of all cultural backgrounds worldwide, based in the European Union*, working in technical companies (electronics, chemistry, biology, research, etc). - 2 modules with resumes, checklists, workbooks, presentations, videos and audios. - Free bonuses: examples of work related proposals written out by 4C Unity, so that they will learn quickly. - The training will take about 2 weeks to complete, 1,5 hours per day. They get lifelong access to the online training. It means as long as this program exists, they will keep access and get all updates. 	<ul style="list-style-type: none"> - Sign up at www.4cunity.com. - Your employees can start quickly with the short explanation and download the workbooks with assignments and checklists. - He/she will get 6 months access to the closed LinkedIn community after starting the training. They can ask questions and get custom advises there. - The total value of the training is € 4,988. Your investment is only € 2,300 excl. VAT, still in 2021. - if you don't consider to buy the training, it will take much longer to make money together, to get them in the action mode and meet the requirements of customers.

* Because of the current tax system it is relatively easy for 4c Unity to do taxes for *digital services* for private persons and companies based in the EU, but not possible to do this for persons and companies based outside the EU. It is unfortunately too complex.
